Summary

I am Adebimpe Adetomiwa, a software developer with a strong focus on front-end development. I have honed my skills in HTML, CSS, and JavaScript, and I specialize in building interactive and responsive web applications using React. With my proficiency in TailwindCSS and Sass, I create visually appealing designs that enhance user experiences.

Currently, I am expanding my expertise by learning and implementing React, Redux Toolkit, Material UI, and TypeScript. I am committed to staying updated with the latest industry trends and best practices. I have successfully developed projects such as a Todo app using React.

I am dedicated to continuously improving my skills. My goal is to develop robust and scalable applications that leverage cutting-edge technologies to deliver exceptional user experiences.

Projects

Anywears   September 2024
E-commerce Project
🔗 https://adebimpe-adetomiwa-22.github.io/anywears

Developed an e-commerce website called Anywears to showcase my frontend development skills using React, Redux Toolkit, TailwindCSS, and the FakeStore API for dummy data. The website features a responsive and visually appealing interface, demonstrating product browsing, cart functionality, and dynamic data fetching. Although not fully functional, Anywears serves as a portfolio piece to highlight my ability to build modern, user-friendly web applications with strong UI/UX design principles and effective state management.

React, Redux Toolkit, TailwindCSS, FakeStore API, JavaScript, Responsive Web Design, State Management, API Integration, UI/UX Design, Git, GitHub

Todo App   April 2024
🔗 https://adebimpe-adetomiwa-22.github.io/todo-app/

The To-Do App is a sleek and user-friendly task management application designed to help users organize their daily tasks with ease. Built using React, React Router, and Tailwind CSS, this app combines modern design with essential functionality for efficient task management.

React, React Router, Tailwindcss

Tenzies Game   May 2024
🔗 https://adebimpe-adetomiwa-22.github.io/tenzies-game/

The Tenzies game is a fun and interactive dice game built using modern web development technologies. It offers a delightful user experience with its simple yet engaging gameplay mechanics. This project demonstrates proficiency in front-end development, particularly with HTML, CSS, JavaScript, React, and Tailwind CSS.
